Hydroforming for Advanced Manufacturing (Woodhead Publishing in Materials)

Hydroforming for Advanced Manufacturing (Woodhead Publishing in Materials)

Hydroforming uses a pressurised fluid to form component shapes. The process allows the manufacture of lighter, more complex shapes with increased strength at lower cost compared to more traditional techniques such as stamping, forging, casting or welding. As a result hydroformed components are increasingly being used in the aerospace, automotive and other industries. This authoritative book reviews the principles, applications and optimisation of this important process.

After an introduction, the first part of the book reviews the principles of hydroforming, from equipment and materials to forming processes, design and modelling. The second part of the book reviews the range of hydroforming techniques, the shaping of particular components and the application of hydroforming in aerospace and automotive engineering.

With its distinguished editor and team of contributors, Hydroforming for advanced manufacturing is a valuable reference for all those developing and applying this important process.

- Reviews the principles of hydroforming
- Explores the range of hydroforming techniques
- Highlights the application of hydroforming in aerospace and automotive engineering

From reader reviews:

Adrian Woodson:

Reading a reserve can be one of a lot of action that everyone in the world loves. Do you like reading book consequently. There are a lot of reasons why people like it. First reading a book will give you a lot of new data. When you read a guide you will get new information due to the fact book is one of numerous ways to share the information or even their idea. Second, looking at a book will make you actually more imaginative. When you reading a book especially tale fantasy book the author will bring someone to imagine the story how the characters do it anything. Third, you may share your knowledge to other people. When you read this Hydroforming for Advanced Manufacturing (Woodhead Publishing in Materials), you are able to tells your family, friends and soon about yours book. Your knowledge can inspire the others, make them reading a publication.

Kenneth Roland:

Your reading 6th sense will not betray anyone, why because this Hydroforming for Advanced Manufacturing (Woodhead Publishing in Materials) book written by well-known writer who really knows well how to make book that may be understand by anyone who also read the book. Written inside good manner for you, leaking every ideas and creating skill only for eliminate your hunger then you still hesitation Hydroforming for Advanced Manufacturing (Woodhead Publishing in Materials) as good book not only by the cover but also with the content. This is one publication that can break don't determine book by its protect, so do you still needing another sixth sense to pick that!? Oh come on your reading sixth sense already said so why you have to listening to yet another sixth sense.

Daniel Watkins:

You could spend your free time to learn this book this reserve. This Hydroforming for Advanced Manufacturing (Woodhead Publishing in Materials) is simple to create you can read it in the playground, in the beach, train and soon. If you did not include much space to bring the particular printed book, you can buy the particular e-book. It is make you quicker to read it. You can save the actual book in your smart phone. Consequently there are a lot of benefits that you will get when one buys this book.

Jimmy Dolce:

A lot of book has printed but it is unique. You can get it by net on social media. You can choose the top book for you, science, comedy, novel, or whatever by simply searching from it. It is called of book Hydroforming for Advanced Manufacturing (Woodhead Publishing in Materials). You can contribute your knowledge by it. Without causing the printed book, it can add your knowledge and make you happier to read. It is most significant that, you must aware about book. It can bring you from one destination for a other place.
