Sri Aurobindo and The Mother: Glimpses of Their Experiments, Experiences and Re Kireet Joshi

Sri Aurobindo emerged in the first decade of the last century as a revolutionary leader of the struggle for India's freedom, who electrified the nation through his writings in the *Bande Mataram* and *Karmayogin*, and chalked out a radical programme of action which guided, in a significant measure, the future course of the struggle. The field of his work widened rather rapidly and after a series of yogic experiences, he withdrew in 1910 to Pondicherry and plunged into a more revolutionary struggle related directly to the evolutionary crisis through which mankind is passing today. In 1914, Mother (Mirra Alfassa) came to Pondicherry from France and joined Sri Aurobindo. Thus began a momentous collaboration for supramental action on earth. Sri Aurobindo and The Mother are being increasingly acknowledged as the leaders of evolution who, in a breathtaking adventure of consciousness, not only crossed the limitations of human consciousness into supramental consciousness but also fixed in the body-consciousness the higher and higher ranges of the supermind so as to effectuate the mutation of our human species. This book is not a summary of the works of Sri Aurobindo and The Mother, but it is a brief account of the inner heart and core of the task that they placed before themselves and of the main stages of accomplishment of that task. This is not a biography of Sri Aurobindo and The Mother, but it is a work of research that aims at bringing together in a brief compass some authentic statements that would enable the reader to have glimpses of a unique experiment that has direct relevance to the course of events on the earth. If our search is free from preconceptions and dogmas, if our search is for knowledge that is comprehensive and authentic, if our search is for action that ensures the highest good of the entire world, then the study of Sri Aurobindo and Mother becomes inescapable. For such indeed was their search, and we have in their voluminous writings authentic descriptions of this search and its progressive achievements.
