Cognitive Science and the Symbolic Operations of Human and Artificial Intelligence: Theory and Research into the Intellective Processes Morton Wagman

This scholarly book presents and critically evaluates the outstanding contributions of both cognitive psychology and artificial intelligence to our understanding of the nature of intelligence and intelligent systems. Examining conceptual thought across the domains of reasoning and logic, language and analogy, and scientific discovery, Wagman compares human reasoning with computer reasoning. Of special interest to readers is the general critique of artificial intelligence research directed toward the ultimate objective of mapping and surpassing all of human knowledge.

The first chapter examines the theoretical foundations of the logical approach to artificial intelligence and the centrality of declarative knowledge and the predicate calculus. The artificial intelligence system, CYC, is critically examined with respect to its avowed objective of matching or surpassing human intelligence. The second chapter focuses on the probabilistic contrast model of causal reasoning and underscores its significance as a mathematical conceptualization of human reasoning. In the third chapter, the ARCS (Analogical Retrieval by Constraint Satisfaction) system is discussed and its psychological validity is evaluated. In the fourth chapter, scientific heuristics characteristics of different developmental levels and differentially applied in the discovery spaces of hypotheses and experiments are analyzed in the context of the philosophy of science. The fifth chapter presents the logic, principles, and applications of PAULINE, a pragmatic language generation system and explains human language pragmatics.

From reader reviews:

Kim Salgado:

Playing with family in a park, coming to see the ocean world or hanging out with friends is thing that usually you have done when you have spare time, then why you don't try matter that really opposite from that. Just one activity that make you not feeling tired but still relaxing, trilling like on roller coaster you have been ride on and with addition info. Even you love Cognitive Science and the Symbolic Operations of Human and Artificial Intelligence: Theory and Research into the Intellective Processes, you may enjoy both. It is good combination right, you still would like to miss it? What kind of hang type is it? Oh seriously its mind hangout guys. What? Still don't obtain it, oh come on its referred to as reading friends.

Kelli Valverde:

Reading a book to be new life style in this year; every people loves to study a book. When you examine a book you can get a wide range of benefit. When you read guides, you can improve your knowledge, mainly because book has a lot of information on it. The information that you will get depend on what sorts of book that you have read. If you want to get information about your review, you can read education books, but if you act like you want to entertain yourself you can read a fiction books, this sort of us novel, comics, as well as soon. The Cognitive Science and the Symbolic Operations of Human and Artificial Intelligence: Theory and Research into the Intellective Processes offer you a new experience in looking at a book.

Flora Gordon:

In this period globalization it is important to someone to obtain information. The information will make you to definitely understand the condition of the world. The condition of the world makes the information quicker to share. You can find a lot of recommendations to get information example: internet, paper, book, and soon. You will see that now, a lot of publisher which print many kinds of book. The actual book that recommended for you is Cognitive Science and the Symbolic Operations of Human and Artificial Intelligence: Theory and Research into the Intellective Processes this publication consist a lot of the information of the condition of this world now. This book was represented how do the world has grown up. The language styles that writer use for explain it is easy to understand. The actual writer made some exploration when he makes this book. This is why this book appropriate all of you.

Christopher McCormick:

You will get this Cognitive Science and the Symbolic Operations of Human and Artificial Intelligence: Theory and Research into the Intellective Processes by go to the bookstore or Mall. Merely viewing or reviewing it could to be your solve difficulty if you get difficulties on your knowledge. Kinds of this publication are various. Not only by means of written or printed but can you enjoy this book through e-book. In the modern era like now, you just looking by your local mobile phone and searching what your problem. Right now, choose your own personal ways to get more information about your book. It is most important to

arrange yourself to make your knowledge are still revise. Let's try to choose appropriate ways for you.
