Negotiating Linguistic Identity: Language and Belonging in Europe (Nationalisms across the Globe)

Negotiating Linguistic Identity: Language and Belonging in Europe (Nationalisms across the Globe)

This volume addresses the themes of language, identity and linguistic politics in Europe. The twelve essays draw on approaches and methodologies from a range of disciplines, from sociolinguistics and contact linguistics to cultural history, psychology and policy studies. Together, they offer a collection of views on how language, society and identity are perceived to be connected. These issues are of particular importance in Europe, where the nation-building project is often paired with a linguistically based notion of social identity.

However, historical forces including shifting borders, economically and politically motivated mobility and changing political regimes have led to more complex national identities and more nuanced approaches to the role of language. Both historical developments and contemporary sociolinguistic contexts are investigated in the book, including the presence of multilingual communities and minority language communities. The volume makes a significant and timely contribution to our understanding of the linguistic landscape of today's Europe.
