Materials Handbook (Handbook) George S. Brady, Henry R. Clauser, John A. Vaccari

The Materials Handbook is an encyclopedic, A-to-Z organization of all types of materials, featuring their key performance properties, principal characteristics and applications in product design. Materials include ferrous and nonferrous metals, plastics, elastomers, ceramics, woods, composites, chemicals, minerals, textiles, fuels, foodstuffs and natural plant and animal substances --more than 13,000 in all. Properties are expressed in both U.S. customary and metric units and a thorough index eases finding details on each and every material.

Introduced in 1929 and often known simply as "Brady's," this comprehensive, one-volume, 1244 page encyclopedia of materials is intended for executives, managers, supervisors, engineers, and technicians, in engineering, manufacturing, marketing, purchasing and sales as well as educators and students.

Of the dozens of families of materials updated in the 15th Edition, the most extensive additions pertain to adhesives, activated carbon, aluminides, aluminum alloys, catalysts, ceramics, composites, fullerenes, heat-transfer fluids, nanophase materials, nickel alloys, olefins, silicon nitride, stainless steels, thermoplastic elastomers, titanium alloys, tungsten alloys, valve alloys and welding and hard-facing alloys.

Also widely updated are acrylics, brazing alloys, chelants, biodegradable plastics, molybdenum alloys, plastic alloys, recycle plastics, superalloys, supercritical fluids and tool steels.

New classes of materials added include aliphatic polyketones, carburizing secondary-hardening steels and polyarylene ether benzimidazoles. Carcinogens and materials likely to be cancer-causing in humans are listed for the first time.

From reader reviews:

Rolando Gil:

Do you have favorite book? Should you have, what is your favorite's book? Reserve is very important thing for us to be aware of everything in the world. Each book has different aim or goal; it means that publication has different type. Some people truly feel enjoy to spend their time to read a book. They may be reading whatever they take because their hobby will be reading a book. What about the person who don't like reading through a book? Sometime, man or woman feel need book whenever they found difficult problem or exercise. Well, probably you should have this Materials Handbook (Handbook).

Lisa Knight:

With other case, little persons like to read book Materials Handbook (Handbook). You can choose the best book if you want reading a book. As long as we know about how is important the book Materials Handbook (Handbook). You can add information and of course you can around the world by a book. Absolutely right, simply because from book you can realize everything! From your country until finally foreign or abroad you will end up known. About simple thing until wonderful thing you can know that. In this era, we could open a book or maybe searching by internet unit. It is called e-book. You can utilize it when you feel bored stiff to go to the library. Let's go through.

Deborah Ayers:

Now a day those who Living in the era everywhere everything reachable by connect with the internet and the resources within it can be true or not require people to be aware of each info they get. How a lot more to be smart in acquiring any information nowadays? Of course the answer is reading a book. Reading a book can help persons out of this uncertainty Information specially this Materials Handbook (Handbook) book as this book offers you rich details and knowledge. Of course the knowledge in this book hundred per cent guarantees there is no doubt in it you know.

Rosa Felton:

As a university student exactly feel bored in order to reading. If their teacher questioned them to go to the library as well as to make summary for some publication, they are complained. Just tiny students that has reading's internal or real their leisure activity. They just do what the teacher want, like asked to the library. They go to right now there but nothing reading significantly. Any students feel that reading through is not important, boring in addition to can't see colorful photographs on there. Yeah, it is being complicated. Book is very important for you. As we know that on this age, many ways to get whatever we want. Likewise word says, many ways to reach Chinese's country. So , this Materials Handbook (Handbook) can make you feel more interested to read.
